

FREE GUIDE · FOR 503B OUTSOURCING FACILITIES

The 503B Facility's Guide to Compliant Waste Disposal.

Sterile compounding, hazardous APIs, and batch waste —
a compounder's waste, not a pharmacy's.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

A compounder's waste is different.

A 503B outsourcing facility is a cGMP compounder, not a dispensing pharmacy — so the waste is different: sterile compounding and cleanroom waste, hazardous active pharmaceutical ingredients, chemotherapy agents, controlled substances, and failed or expired batches. Each has its own rule. This guide covers every stream.

The good news

We handle 503B compounding waste — sterile, hazardous-API, chemo, and controlled — with USP 800 and EPA-compliant destruction and a Certificate of Destruction. No contract.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Sterile compounding & batch waste

Failed, expired, or out-of-spec compounded batches plus cleanroom and fill-finish waste.

GOES IN THIS STREAM

- Failed / expired compounded batches
- Out-of-spec & quarantined product
- Cleanroom & fill-finish waste

DOES NOT GO HERE

- Sharps (sharps kit)
- Reusable equipment

THE RULE · Destroy to the appropriate standard with cGMP-compatible documentation; hazardous and controlled batches follow their own rules below.

DISPOSE WITH · Bulk pharmaceutical / hazardous destruction (we scope this with you).

Tip

Segregate hazardous-API and controlled batches before they enter general compounding waste.

WASTE STREAM 02

RCRA-hazardous drugs

Hazardous APIs and chemotherapy agents — often the bulk of a 503B's hazardous waste.

GOES IN THIS STREAM

- P-listed (warfarin $\geq 0.3\%$, nicotine, epinephrine)
- U-listed drugs
- Characteristic waste (ignitable, toxic)
- Certain chemotherapy agents

DOES NOT GO HERE

- Non-hazardous pharmaceuticals
- Controlled substances (own path)

THE RULE · EPA RCRA — identify P/U-listed and characteristic drugs, segregate, and destroy to EPA standards; know your generator status.

DISPOSE WITH · RCRA-hazardous mail-back kit.

Tip

Nicotine and epinephrine are P-listed — easy to miss and a common citation.

WASTE STREAM 03

Controlled substances

If you compound with controlled substances, expired and wasted stock is destroyed non-retrievable.

GOES IN THIS STREAM

- Expired / unused Schedule II–V stock
- Returns of controls (per program)
- Partial & wasted doses

DOES NOT GO HERE

- Non-controlled meds (pharmaceutical kit)
- Sharps

THE RULE · DEA — Form 222 for Schedule II transfers, Form 41 for surrendered controls, and non-retrievable destruction with records.

DISPOSE WITH · Controlled-substance mail-back / reverse distribution, to DEA standards.

Tip

We're a DEA-registered reverse distributor — the credential that makes taking back your controls legal.

WASTE STREAM 04

Pharmaceutical waste (non-hazardous)

Non-hazardous compounded and raw-material waste.

GOES IN THIS STREAM

- Expired non-controlled, non-hazardous Rx
- OTC & compounded non-haz product
- Samples

DOES NOT GO HERE

- Controlled substances
- RCRA-hazardous drugs
- Sharps

THE RULE · Do not drain-dispose; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit.

Tip

Segregate hazardous and controlled drugs first — everything else routes here.

WASTE STREAM 05

Sharps

From filling, sampling, and QC.

GOES IN THIS STREAM

- Immunization needles & syringes
- Lancets
- Point-of-care testing sharps

DOES NOT GO HERE

- Non-sharp meds
- Bloody gauze (biohazard)

THE RULE · OSHA — FDA-cleared, puncture-resistant containers; annual training if staff are exposed.

DISPOSE WITH · Sharps mail-back kit.

Tip

Immunizing pharmacies generate more sharps than they expect — size accordingly.

YOUR CHECKLIST

The 503B facility compliance checklist.

- ☐ Failed/expired compounded batches destroyed with cGMP-compatible documentation.
- ☐ Hazardous APIs and chemo agents (RCRA / USP 800) segregated and destroyed to EPA standards.
- ☐ Controlled-substance compounding waste rendered non-retrievable with a Form 41.
- ☐ Non-hazardous compounding waste destroyed with documentation.
- ☐ Sharps in FDA-cleared containers.
- ☐ Certificates of Destruction retained for your quality records.

QUESTIONS 503B FACILITIES ASK

Your 503B questions, answered.

How do we dispose of failed or expired compounded batches?

We scope bulk destruction with you — hazardous and controlled batches follow their own paths, and everything is documented for your quality records.

How are hazardous APIs and chemo agents handled?

As RCRA-hazardous waste under EPA rules, with USP 800-aligned handling, destroyed to EPA standards.

What about controlled-substance compounding?

Expired and wasted controlled stock is rendered non-retrievable with a DEA Form 41.

Do you provide documentation for our quality system?

Yes — Certificates of Destruction for every batch, archived to your account.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY**Handle it with mail-back.**

Easy Rx Cycle scopes a destruction program for your 503B facility — sterile, hazardous-API, chemo, and controlled waste, by scheduled pickup or mail-back where it fits, with USP 800 and EPA-compliant destruction and Certificates of Destruction for your quality records. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
Failed / expired batches	Bulk pharmaceutical destruction (scoped)
Hazardous APIs / chemo	RCRA-hazardous destruction (USP 800)
Controlled compounding waste	Controlled destruction (Form 41)
Non-hazardous compounding waste	Pharmaceutical waste kit
Sharps	Sharps mail-back kit

Prefer pickup, or higher volume?

503B volume and batch waste usually call for a scheduled, scoped program rather than mail-back kits. Let's build it — get a quote at easyrxcycle.com/get-a-quote or call 501-904-2929.

WHY 503B FACILITIES CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your 503B facility waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
