

FREE GUIDE · FOR ALLERGY & IMMUNOTHERAPY

The Allergy Clinic's Guide to Compliant Waste Disposal.

High-volume shot sharps, allergen serums, and
P-listed epinephrine — every stream, handled right.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

Shots, serums, and P-listed epinephrine.

Allergy and immunotherapy clinics generate a steady, high volume of allergy-shot sharps, plus expired allergen extracts and serums — and epinephrine, which is a P-listed federally hazardous waste that a lot of clinics throw in the wrong bin. This guide covers every stream, including that one.

The good news

One vendor can take your high-volume shot sharps, expired serums, and P-listed epinephrine — with a Certificate of Destruction and no contract.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Sharps

High volume — allergy-shot needles add up fast.

GOES IN THIS STREAM

- Allergy-shot needles & syringes
- Skin-test sharps
- Lancets

DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

THE RULE · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

DISPOSE WITH · Sharps mail-back kit.

Tip

Replace containers at the fill line; keep them upright, closable, and out of reach.

WASTE STREAM 02

Hazardous drugs — epinephrine

The stream clinics miss — epinephrine is a P-listed federally hazardous waste, not ordinary pharmaceutical waste.

GOES IN THIS STREAM

- Expired epinephrine & auto-injectors
- Other P/U-listed drugs
- Characteristic hazardous waste

DOES NOT GO HERE

- Non-hazardous serums & meds
- Sharps

THE RULE · EPA RCRA — P-listed drugs like epinephrine must be segregated and destroyed to EPA standards.

DISPOSE WITH · RCRA-hazardous mail-back kit.

Tip

Expired epinephrine and EpiPens are P-listed — never in normal pharmaceutical or red-bag waste.

WASTE STREAM 03

Pharmaceutical waste

Expired allergen extracts, serums, and non-hazardous meds.

GOES IN THIS STREAM

- Expired allergen extracts & serums
- Non-controlled, non-hazardous meds
- Samples

DOES NOT GO HERE

- Controlled substances (own kit)
- RCRA-hazardous drugs (own kit)
- Sharps

THE RULE · Do not drain-dispose; segregate hazardous and controlled drugs; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit.

Tip

Segregate hazardous and controlled drugs first — everything else routes here.

WASTE STREAM 04

Biohazard / regulated medical waste

Any blood-contaminated materials.

GOES IN THIS STREAM

- Blood-soaked gauze
- Contaminated PPE
- Skin-test waste (if contaminated)

DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

THE RULE · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, retained documentation.

DISPOSE WITH · Biohazard mail-back kit.

Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — check your state's definition.

YOUR CHECKLIST

The allergy clinic compliance checklist.

- ☐ Allergy-shot sharps in FDA-cleared containers, replaced often (high volume).
- ☐ Expired epinephrine and EpiPens segregated and destroyed as P-listed hazardous waste.
- ☐ Expired allergen extracts and serums destroyed with documentation.

- ☐ Any blood-contaminated materials red-bagged as biohazard.
- ☐ Staff trained annually on OSHA bloodborne pathogens.
- ☐ Certificates of Destruction retained per your state's rules.

QUESTIONS ALLERGY CLINICS ASK

Your allergy clinic questions, answered.

How do we dispose of expired epinephrine or EpiPens?

As P-listed RCRA-hazardous waste — segregated from normal pharmaceutical and red-bag waste and destroyed to EPA standards. This is the most common allergy-clinic mistake.

What do we do with expired allergen serums and extracts?

As pharmaceutical waste — destroyed with documentation, not flushed or trashed.

We give a lot of shots — how do we manage the sharps?

We size your sharps kits to your shot volume so containers never overflow.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY

Handle it with mail-back.

Easy Rx Cycle ships prepaid mail-back kits sized to an allergy clinic — high-volume shot sharps, expired serums, and P-listed epinephrine — destroyed at our DEA-registered facility with a Certificate of Destruction. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
Allergy-shot sharps	Sharps mail-back kit
Epinephrine / EpiPens (P-listed)	RCRA-hazardous mail-back kit
Expired serums & extracts	Pharmaceutical waste kit
Blood-contaminated waste	Biohazard mail-back kit

Prefer pickup, or higher volume?

Mail-back suits most allergy clinics. Higher volume or multi-site? We'll size a program — get a quote at easyrxcycle.com/get-a-quote or call 501-904-2929.

WHY ALLERGY & IMMUNOTHERAPY CLINICS CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your allergy clinic waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
