

FREE GUIDE · FOR BLOOD & PLASMA CENTERS

The Blood / Plasma Center's Guide to Compliant Disposal.

Phlebotomy at volume — sharps and blood
biohazard are the whole game.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

High-volume phlebotomy.

Blood and plasma donation centers run phlebotomy at very high volume, so two streams dominate: sharps and blood-contaminated biohazard — used needles, tubing, bags, and rejected or expired units. At your scale, the program has to keep up without ever letting a container overflow. This guide covers every stream.

The good news

One partner can take your high-volume sharps and blood biohazard on a scheduled cadence built for donation throughput — with manifests and Certificates of Destruction. No contract.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Sharps

High-volume phlebotomy sharps.

GOES IN THIS STREAM

- Phlebotomy needles
- Collection-set sharps
- Lancets & syringes

DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

THE RULE · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

DISPOSE WITH · Sharps mail-back kit or scheduled pickup.

Tip

Replace containers at the fill line; keep them upright, closable, and out of reach.

WASTE STREAM 02

Biohazard / regulated medical waste

Blood-contaminated collection materials and units.

GOES IN THIS STREAM

- Used tubing, bags & collection sets
- Rejected & expired units
- Blood-soaked materials & PPE

DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

THE RULE · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, retained documentation.

DISPOSE WITH · Biohazard mail-back kit or scheduled pickup.

Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — check your state's definition.

WASTE STREAM 03

Pharmaceutical waste

Expired anticoagulants and non-controlled supplies.

GOES IN THIS STREAM

- Expired anticoagulants
- Non-controlled reagents & meds
- Expired supplies

DOES NOT GO HERE

- Controlled substances (own path)
- RCRA-hazardous drugs (own kit)
- Sharps

THE RULE · Do not drain-dispose; segregate hazardous and controlled drugs; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit.

Tip

Segregate hazardous and controlled drugs first — everything else routes here.

YOUR CHECKLIST

The blood / plasma center compliance checklist.

- ☐ Phlebotomy sharps in FDA-cleared containers, replaced on a cadence matched to throughput.
- ☐ Blood-contaminated tubing, bags, and units red-bagged and destroyed.
- ☐ Rejected and expired units handled per your SOPs and state rules.
- ☐ Expired anticoagulants and reagents destroyed with documentation.
- ☐ Staff trained annually on OSHA bloodborne pathogens.
- ☐ Manifests and Certificates of Destruction retained per regulatory and accreditation rules.

QUESTIONS DONATION CENTERS ASK

Your donation center questions, answered.

How do we keep up with sharps volume on a busy day?

We set a pickup cadence and container sizing to your donation throughput so you never run out of space mid-shift.

How are rejected or expired blood units handled?

As regulated medical waste — red-bagged and destroyed with documentation, per your SOPs and state rules.

Can you handle multiple centers?

Yes — one consistent program and unified documentation across every site, no contract.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY

Handle it with mail-back.

Easy Rx Cycle serves blood and plasma centers with scheduled, high-throughput sharps and biohazard service (mail-back for smaller sites) — manifests and Certificates of Destruction included. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
Phlebotomy sharps	Sharps kit or scheduled pickup
Tubing / bags / units	Biohazard pickup
Expired anticoagulants / reagents	Pharmaceutical waste kit

Prefer pickup, or higher volume?

Donation volume almost always favors scheduled pickup on a set cadence. We'll build it — get a quote at easyrxcycle.com/get-a-quote or call 501-904-2929.

WHY BLOOD & PLASMA CENTERS CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your donation center waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
