

FREE GUIDE · FOR CHIROPRACTIC

The Chiropractic Office's Guide to Compliant Disposal.

Little to no regulated waste — unless you do
dry needling or injections. Here's what applies.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

Do you even generate regulated waste?

Most chiropractic offices generate little to no regulated medical waste. But if you offer dry needling, trigger-point injections, or draw labs, you produce sharps that can't legally go in the trash. This short guide tells you exactly when the rules apply to you — and the simplest way to comply if they do.

The good news

If you do use needles, you don't need a hauler or a contract — a prepaid mail-back sharps kit, sized to your low volume, with a Certificate of Destruction.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Sharps

Dry-needling, trigger-point injection, and lab-draw sharps.

GOES IN THIS STREAM

- Dry-needling & acupuncture needles
- Trigger-point injection sharps
- Lab-draw needles & lancets

DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

THE RULE · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

DISPOSE WITH · Sharps mail-back kit.

Tip

Replace containers at the fill line; keep them upright, closable, and out of reach.

WASTE STREAM 02

Biohazard / regulated medical waste

Any blood-contaminated materials from needling or labs.

GOES IN THIS STREAM

- Blood-contaminated cotton / gauze
- Contaminated PPE
- Procedure waste (if any)

DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

THE RULE · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, retained documentation.

DISPOSE WITH · Biohazard mail-back kit.

Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — check your state's definition.

WASTE STREAM 03

Pharmaceutical waste

Expired injectables, if you stock any.

GOES IN THIS STREAM

- Expired injectable solutions
- Other expired non-controlled meds
- Samples

DOES NOT GO HERE

- Controlled substances (own kit)
- RCRA-hazardous drugs (own kit)
- Sharps

THE RULE · Do not drain-dispose; segregate hazardous and controlled drugs; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit.

Tip

Segregate hazardous and controlled drugs first — everything else routes here.

YOUR CHECKLIST

The chiropractic compliance checklist.

- ☐ If you do dry needling or injections, sharps go in an FDA-cleared container — never the trash.
- ☐ Blood-contaminated cotton or gauze red-bagged as biohazard.
- ☐ Any expired injectables destroyed as pharmaceutical waste.
- ☐ Kits sized to a low-volume office — no over-buying.
- ☐ Staff aware of basic sharps and bloodborne-pathogen safety.
- ☐ Certificates of Destruction retained per your state's rules.

QUESTIONS CHIROPRACTORS ASK

Your chiropractic questions, answered.

Does a chiropractic office need medical-waste disposal at all?

Only if you generate it — dry needling, trigger-point injections, or lab draws create sharps that require compliant disposal. Adjustment-only practices usually generate none.

How do we dispose of dry-needling or acupuncture needles?

In an FDA-cleared sharps container, then a prepaid sharps mail-back kit — simple and low-cost at your volume.

What about blood-spotted cotton balls?

If visibly blood-contaminated, they're biohazard; otherwise ordinary trash. Check your state's definition.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY

Handle it with mail-back.

Easy Rx Cycle ships prepaid mail-back sharps kits sized to a low-volume chiropractic office — for dry needling, injections, or lab draws — destroyed at our DEA-registered facility with a Certificate of Destruction. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
Dry-needling / injection sharps	Sharps mail-back kit
Blood-contaminated cotton	Biohazard mail-back kit
Expired injectables (if any)	Pharmaceutical waste kit

Prefer pickup, or higher volume?

Mail-back is right for virtually every chiropractic office. Questions about whether you need anything at all? Call 501-904-2929 — we'll tell you straight.

WHY CHIROPRACTIC OFFICES CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your chiropractic office waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
