

FREE GUIDE · FOR DERMATOLOGY

# The Dermatology Practice's Guide to Compliant Disposal.

Biopsy sharps, topical chemo, and biohazard —  
every stream, including the hazardous ones.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

## Topical chemo is the one you miss.

Dermatology practices generate injection and biopsy sharps, tissue and blood biohazard from excisions and Mohs surgery, and expired medications — including topical chemotherapy agents like fluorouracil (5-FU) that are federally hazardous waste. That last one is the stream most practices get wrong. This guide covers every stream.

### The good news

One vendor can take your sharps, biohazard, and expired meds — including hazardous topical chemo — with a Certificate of Destruction and no contract.

### AT A GLANCE

## Who regulates what.

| Agency | What it covers in your practice                                                         |
|--------|-----------------------------------------------------------------------------------------|
| OSHA   | Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training. |
| EPA    | RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.     |
| DEA    | Controlled substances — non-retrievable destruction and DEA Form 41 documentation.      |
| DOT    | Safe shipping of regulated medical and pharmaceutical waste in transit.                 |
| State  | Health-department and environmental rules that vary by state.                           |

### THE STREAMS

## Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

### WASTE STREAM 01

## Sharps

Injection, biopsy, and excision sharps, including Mohs surgery.

#### GOES IN THIS STREAM

- Injection needles & syringes
- Punch biopsy & suture needles
- Scalpel & Mohs blades

#### DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

**THE RULE** · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

**DISPOSE WITH** · Sharps mail-back kit.

#### Tip

Replace containers at the fill line; keep them upright, closable, and out of reach.

### WASTE STREAM 02

## Hazardous topical chemo & drugs

The stream most dermatology practices miss — topical chemotherapy agents are federally hazardous waste, not ordinary pharmaceutical waste.

#### GOES IN THIS STREAM

- Expired fluorouracil (5-FU) & topical chemo
- Other RCRA-hazardous drugs
- Characteristic hazardous waste

#### DOES NOT GO HERE

- Non-hazardous topicals & meds
- Sharps

**THE RULE** · EPA RCRA — topical chemo and other hazardous drugs must be segregated and destroyed to EPA standards.

**DISPOSE WITH** · RCRA-hazardous mail-back kit.

#### Tip

Fluorouracil (5-FU) is a hazardous drug — never put it in normal pharmaceutical or red-bag waste.

### WASTE STREAM 03

## Biohazard / regulated medical waste

Tissue and blood waste from biopsies and excisions.

#### GOES IN THIS STREAM

- Excised tissue & biopsy specimens (per state)
- Blood-soaked gauze
- Contaminated PPE

#### DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

**THE RULE** · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, retained documentation.

**DISPOSE WITH** · Biohazard mail-back kit.

#### Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — check your state's definition.

#### WASTE STREAM 04

### Pharmaceutical waste

Expired non-controlled, non-hazardous medications.

#### GOES IN THIS STREAM

- Expired non-controlled injectables
- Non-hazardous topicals
- Samples

#### DOES NOT GO HERE

- Controlled substances (own kit)
- RCRA-hazardous drugs (own kit)
- Sharps

**THE RULE** · Do not drain-dispose; segregate hazardous and controlled drugs; destroy with documentation.

**DISPOSE WITH** · Pharmaceutical waste mail-back kit.

#### Tip

Segregate hazardous and controlled drugs first — everything else routes here.

#### YOUR CHECKLIST

### The dermatology compliance checklist.

- ☐ Biopsy, injection, and Mohs sharps in FDA-cleared containers, replaced at the fill line.
- ☐ Topical chemo (5-FU) and hazardous drugs segregated and destroyed to EPA standards.
- ☐ Excised tissue and biopsy specimens handled per your state's rules.

- ☐ Expired non-hazardous meds destroyed with documentation.
- ☐ Staff trained annually on OSHA bloodborne pathogens.
- ☐ Certificates of Destruction retained per your state's rules.

#### QUESTIONS DERMATOLOGISTS ASK

## Your dermatology questions, answered.

### How do we dispose of expired 5-FU or topical chemo?

As RCRA-hazardous waste — segregated from normal pharmaceutical waste and destroyed to EPA standards. Topical chemo is a hazardous drug, not ordinary Rx waste.

### What do we do with excised tissue and biopsy specimens?

They're regulated medical waste; specific rules for tissue vary by state — we'll confirm yours.

### Are Mohs and excision sharps handled like any sharps?

Yes — blades and needles go in an FDA-cleared sharps container and a sharps mail-back kit.

### Do we need a contract?

No — no contract, no minimums.

#### THE EASY WAY

## Handle it with mail-back.

Easy Rx Cycle ships prepaid mail-back kits sized to a dermatology practice — sharps, biohazard, expired meds, and hazardous topical chemo — destroyed at our DEA-registered facility with a Certificate of Destruction. No contract.

#### QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

| Waste stream                     | The right path               |
|----------------------------------|------------------------------|
| Biopsy / Mohs sharps             | Sharps mail-back kit         |
| Topical chemo (5-FU) / hazardous | RCRA-hazardous mail-back kit |
| Tissue / biopsy biohazard        | Biohazard mail-back kit      |
| Expired non-hazardous meds       | Pharmaceutical waste kit     |

## Prefer pickup, or higher volume?

Mail-back suits most dermatology practices. Higher volume or a Mohs surgery center? We'll size a program — get a quote at [easyrxcycle.com/get-a-quote](https://easyrxcycle.com/get-a-quote) or call 501-904-2929.

## WHY DERMATOLOGY PRACTICES CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

## Ready to simplify your dermatology practice waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
