

FREE GUIDE · FOR DIALYSIS CENTERS

The Dialysis Center's Guide to Compliant Disposal.

High-volume fistula sharps and blood waste —
plus expired meds, handled right.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

High-volume sharps and blood.

Dialysis centers generate very high volumes of fistula-access sharps and blood-contaminated biohazard, plus expired medications like heparin and erythropoiesis-stimulating agents. The sheer volume makes a well-sized, documented program essential. This guide covers every stream.

The good news

One vendor can take your high-volume sharps and blood waste plus expired meds — mail-back or scheduled pickup — with a Certificate of Destruction and no contract.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Sharps

Very high volume — fistula-access needles and blood-line sharps every treatment.

GOES IN THIS STREAM

- Fistula-access needles
- Blood-line & injection sharps
- Lancets

DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

THE RULE · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

DISPOSE WITH · Sharps mail-back kit or scheduled pickup.

Tip

Replace containers at the fill line; high-volume sites should check daily.

WASTE STREAM 02

Biohazard / regulated medical waste

Blood-saturated materials from access and treatment.

GOES IN THIS STREAM

- Blood-soaked gauze & dressings
- Blood-line & dialyzer waste (per state)
- Contaminated PPE

DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

THE RULE · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, retained documentation.

DISPOSE WITH · Biohazard mail-back kit or scheduled pickup.

Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — over-classifying at volume is costly.

WASTE STREAM 03

Pharmaceutical waste

Expired non-controlled medications common to dialysis.

GOES IN THIS STREAM

- Expired heparin (non-controlled)
- Erythropoiesis-stimulating agents
- Non-controlled injectables

DOES NOT GO HERE

- Controlled substances (own kit)
- RCRA-hazardous drugs (own kit)
- Sharps

THE RULE · Do not drain-dispose; segregate hazardous and controlled drugs; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit or pickup.

Tip

Segregate hazardous and controlled drugs first — everything else routes here.

YOUR CHECKLIST

The dialysis center compliance checklist.

- ☐ Fistula-access sharps in FDA-cleared containers, checked daily (high volume).
- ☐ Blood-contaminated biohazard red-bagged and destroyed with documentation.
- ☐ Expired heparin and ESAs destroyed as pharmaceutical waste.
- ☐ Containers sized to volume so they never overfill.
- ☐ Staff trained annually on OSHA bloodborne pathogens.
- ☐ Certificates of Destruction retained per your state's rules.

QUESTIONS DIALYSIS CENTERS ASK

Your dialysis center questions, answered.

We generate a huge volume of sharps — how do we manage it?

We size your kits and/or scheduled pickup to your treatment volume so containers never overfill — the most common dialysis citation.

How do we dispose of blood-line and dialyzer waste?

Blood-saturated materials are biohazard / regulated medical waste; specific dialyzer rules vary by state — we'll confirm yours.

What about expired heparin and ESAs?

Non-controlled expired meds are pharmaceutical waste, destroyed with documentation.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY

Handle it with mail-back.

Easy Rx Cycle handles dialysis waste by prepaid mail-back or scheduled pickup, sized to your treatment volume — sharps, blood-contaminated biohazard, and expired meds, with a Certificate of Destruction. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
Fistula-access sharps	Sharps kit or pickup (sized to volume)
Blood-contaminated biohazard	Biohazard kit or pickup
Expired heparin / ESAs	Pharmaceutical waste kit

Prefer pickup, or higher volume?

Dialysis volume often outgrows mail-back — scheduled pickup keeps you ahead of it. Get a quote at easyrxcycle.com/get-a-quote or call 501-904-2929.

WHY DIALYSIS CENTERS CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your dialysis center waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
