

FREE GUIDE · FOR FERTILITY & IVF CLINICS

The Fertility / IVF Clinic's Guide to Compliant Disposal.

Injection sharps, hormones, and lab biohazard —
every regulated stream, handled right.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

Injections, hormones, and lab waste.

Fertility and IVF clinics run a high volume of injection sharps — patient self-injection support and in-clinic procedures — plus expired hormones, retrieval and andrology-lab biohazard, and sometimes sedation. This guide covers every regulated stream and the simplest compliant way to handle each.

The good news

One vendor can take your injection sharps, expired hormones, and lab biohazard by prepaid mail-back kit, with a Certificate of Destruction and no contract.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Sharps

High volume — patient self-injection support, retrievals, and procedures.

GOES IN THIS STREAM

- Injection needles & syringes
- Egg-retrieval & procedure sharps
- Lancets

DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

THE RULE · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

DISPOSE WITH · Sharps mail-back kit.

Tip

Replace containers at the fill line; keep them upright, closable, and out of reach.

WASTE STREAM 02

Pharmaceutical waste

Expired fertility hormones and medications.

GOES IN THIS STREAM

- Expired gonadotropins & hCG
- Progesterone & estradiol
- Non-controlled injectables & samples

DOES NOT GO HERE

- Controlled substances (own kit)
- RCRA-hazardous drugs (own kit)
- Sharps

THE RULE · Do not drain-dispose; segregate hazardous and controlled drugs; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit.

Tip

Segregate hazardous and controlled drugs first — everything else routes here.

WASTE STREAM 03

Biohazard / regulated medical waste

Retrieval, andrology, and blood-draw waste.

GOES IN THIS STREAM

- Egg-retrieval & procedure biohazard
- Andrology-lab waste (per protocol)
- Blood-soaked materials

DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

THE RULE · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, retained documentation.

DISPOSE WITH · Biohazard mail-back kit.

Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — check your state's definition.

WASTE STREAM 04

Controlled substances

If you use sedation for retrievals.

GOES IN THIS STREAM

- Expired / unused Schedule II-V sedatives
- Wasted & partial doses
- Surrendered controlled stock

DOES NOT GO HERE

- Non-controlled meds (pharmaceutical kit)
- Sharps

THE RULE · DEA — render non-retrievable, complete a DEA Form 41 for surrendered controls, keep witnessed waste logs.

DISPOSE WITH · Controlled-substance / medication mail-back kit, to DEA standards.

Tip

Log and witness every wasted controlled dose — the DEA checks the paper trail.

YOUR CHECKLIST

The fertility / IVF compliance checklist.

- ☐ Injection sharps in FDA-cleared containers, replaced often (high volume).
- ☐ Expired hormones and fertility meds destroyed with documentation.
- ☐ Retrieval and andrology-lab biohazard handled per protocol and state rules.

- ☐ Any sedation controls non-retrievable with a Form 41.
- ☐ Staff trained annually on OSHA bloodborne pathogens.
- ☐ Certificates of Destruction retained per your state's rules.

QUESTIONS FERTILITY CLINICS ASK

Your fertility clinic questions, answered.

How do we handle the volume of injection sharps?

Patient self-injection support drives real volume — we size your sharps kits so containers never overfill.

How do we dispose of expired fertility hormones?

As pharmaceutical waste — gonadotropins, hCG, progesterone, and estradiol are destroyed with documentation, not flushed.

What about retrieval and andrology-lab waste?

Procedure and lab biohazard are regulated medical waste; specifics vary by protocol and state — we'll confirm yours.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY

Handle it with mail-back.

Easy Rx Cycle ships prepaid mail-back kits sized to a fertility or IVF clinic — injection sharps, expired hormones, and lab biohazard — destroyed at our DEA-registered facility with a Certificate of Destruction. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
Injection sharps	Sharps mail-back kit
Expired hormones / meds	Pharmaceutical waste kit
Retrieval / andrology biohazard	Biohazard mail-back kit

Waste stream

The right path

Sedation controls (if any)

Controlled / medication kit (Form 41)

Prefer pickup, or higher volume?

Mail-back suits most fertility clinics. Higher volume or multi-site? We'll size a program — get a quote at easyrxcycle.com/get-a-quote or call 501-904-2929.

WHY FERTILITY & IVF CLINICS CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your fertility clinic waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
