

FREE GUIDE · FOR HOME HEALTH AGENCIES

The Home Health Agency's Guide to Compliant Disposal.

Distributed, in-home care — mail-back kits
for sharps and medications, everywhere.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

Care everywhere, waste everywhere.

Home health agencies deliver care across many homes — so regulated waste is distributed, not centralized. In-home injection sharps, patient medications (including controls), and wound-care biohazard all need a compliant path that works house to house. Prepaid mail-back kits are the natural fit. This guide covers every stream.

The good news

One vendor equips your clinicians with prepaid mail-back kits for in-home sharps and medications — plus on-site deactivation for controls — all destroyed with a Certificate of Destruction. No contract.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Sharps

In-home injection sharps across every patient home.

GOES IN THIS STREAM

- Injection needles & syringes
- Insulin pens & needles
- Lancets

DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

THE RULE · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

DISPOSE WITH · Sharps mail-back kit.

Tip

Replace containers at the fill line; keep them upright, closable, and out of reach.

WASTE STREAM 02

Controlled substances

Patient controlled substances that must be safely destroyed when discontinued.

GOES IN THIS STREAM

- Discontinued patient controls
- Unused Schedule II–V meds
- Wasted doses

DOES NOT GO HERE

- Non-controlled meds (pharmaceutical kit)
- Sharps

THE RULE · DEA — render non-retrievable, DEA Form 41 for surrendered controls, witnessed logs; on-site deactivation meets non-retrievable guidance.

DISPOSE WITH · Controlled / medication mail-back kit, or on-site deactivation, to DEA standards.

Tip

On-site deactivation lets you render controls non-retrievable immediately — useful when meds shouldn't leave the building.

WASTE STREAM 03

Pharmaceutical waste

Expired and discontinued patient medications.

GOES IN THIS STREAM

- Expired non-controlled meds
- Discontinued patient meds
- Comfort-care medications

DOES NOT GO HERE

- Controlled substances (own path)
- RCRA-hazardous drugs (own kit)
- Sharps

THE RULE · Do not drain-dispose; segregate hazardous and controlled drugs; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit or on-site deactivation.

Tip

Segregate hazardous and controlled drugs first — everything else routes here.

WASTE STREAM 04

Biohazard / regulated medical waste

In-home wound-care regulated waste.

GOES IN THIS STREAM

- Blood-soaked dressings
- Contaminated PPE
- Wound-care biohazard

DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

THE RULE · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, retained documentation.

DISPOSE WITH · Biohazard mail-back kit.

Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — check your state's definition.

YOUR CHECKLIST

The home health compliance checklist.

- ☐ Clinicians equipped with prepaid mail-back sharps kits for in-home use.
- ☐ Patient controlled substances rendered non-retrievable (mail-back or on-site) with Form 41.
- ☐ Expired and discontinued patient meds destroyed with documentation.

- ☐ In-home wound-care biohazard handled compliantly.
- ☐ Staff trained on safe in-home disposal and bloodborne pathogens.
- ☐ Certificates of Destruction retained per your state's rules.

QUESTIONS HOME HEALTH AGENCIES ASK

Your home health questions, answered.

How do we handle sharps used in patients' homes?

Prepaid mail-back sharps kits are designed for distributed, in-home care — your clinician fills, seals, and mails from anywhere.

What about patient controlled substances?

Discontinued or unused controls are rendered non-retrievable — mail-back or on-site deactivation — with a DEA Form 41.

Can we equip each clinician with kits?

Yes — buy kits as you need them, no contract or minimums.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY

Handle it with mail-back.

Easy Rx Cycle equips home health clinicians with prepaid mail-back kits for in-home sharps and medications, plus on-site deactivation for controls — all destroyed compliantly with a Certificate of Destruction. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
In-home sharps	Sharps mail-back kit
Patient controls	On-site deactivation or controlled mail-back (Form 41)
Expired patient meds	Pharmaceutical waste kit
Wound-care biohazard	Biohazard mail-back kit

Prefer pickup, or higher volume?

Home health is distributed — mail-back and on-site deactivation fit better than pickup. We'll set it up — get a quote at easyrxcycle.com/get-a-quote or call 501-904-2929.

WHY HOME HEALTH AGENCIES CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your home health agency waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
