

FREE GUIDE · FOR IV & KETAMINE CLINICS

The IV & Ketamine Clinic's Guide to Compliant Disposal.

Ketamine is a controlled substance —
here's how to handle it, and every IV stream.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

Ketamine puts you on the DEA's radar.

IV hydration and ketamine clinics run controlled ketamine (Schedule III) alongside a steady stream of IV sharps, expired infusions and vitamins, and blood waste. The ketamine piece brings DEA requirements most wellness businesses aren't set up for. This guide covers every stream and how to handle each.

The good news

As a DEA-registered destruction company we handle wasted and expired ketamine non-retrievable with a Form 41 — plus your IV sharps and biohazard — by prepaid mail-back kit, no contract.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Controlled substances

Ketamine (Schedule III) — the stream that brings the DEA into your clinic.

GOES IN THIS STREAM

- Expired / unused ketamine (Sch III)
- Wasted or partial ketamine doses
- Other controlled infusions

DOES NOT GO HERE

- Non-controlled meds (pharmaceutical kit)
- Sharps

THE RULE · DEA — render non-retrievable, complete a DEA Form 41 for surrendered controls, and keep witnessed waste logs.

DISPOSE WITH · Controlled-substance / medication mail-back kit, to DEA standards.

Tip

Log and witness every wasted controlled dose — the DEA checks the paper trail.

WASTE STREAM 02

Sharps

IV catheters, needles, and injection sharps.

GOES IN THIS STREAM

- IV catheters & needles
- Injection syringes
- Lancets

DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

THE RULE · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

DISPOSE WITH · Sharps mail-back kit.

Tip

Replace containers at the fill line and keep them upright, closable, and out of reach.

WASTE STREAM 03

Pharmaceutical waste

Expired IV medications, vitamins, and infusion additives.

GOES IN THIS STREAM

- Expired IV meds & vitamins
- Non-controlled infusion additives
- Samples

DOES NOT GO HERE

- Controlled substances (own kit)
- RCRA-hazardous drugs (own kit)
- Sharps

THE RULE · Do not drain-dispose; segregate hazardous drugs; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit.

Tip

Keep any hazardous or controlled drugs separate — they each have their own path.

WASTE STREAM 04

Biohazard / regulated medical waste

IV-start and blood-draw waste.

GOES IN THIS STREAM

- Blood-soaked gauze
- Contaminated PPE
- IV / blood tubing

DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

THE RULE · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, and retained documentation.

DISPOSE WITH · Biohazard mail-back kit.

Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — over-classifying wastes money.

YOUR CHECKLIST

The IV & ketamine clinic compliance checklist.

- ☐ Ketamine logged, rendered non-retrievable, with a DEA Form 41.
- ☐ Every wasted ketamine dose witnessed and documented.
- ☐ IV sharps in FDA-cleared containers, replaced at the fill line.

- ☐ Expired IV meds and vitamins destroyed with documentation.
- ☐ Staff trained annually on OSHA bloodborne pathogens.
- ☐ Certificates of Destruction retained per your state's rules.

QUESTIONS IV CLINICS ASK

Your IV clinic questions, answered.

Is ketamine a controlled substance?

Yes — ketamine is Schedule III. Expired or wasted ketamine must be destroyed non-retrievable with a DEA Form 41 and witnessed logs.

How do we dispose of wasted ketamine?

Through a DEA-compliant non-retrievable method with a Form 41 — never poured out or trashed.

What about IV bags and expired vitamins?

Expired non-controlled IV meds and vitamins are pharmaceutical waste — destroyed with documentation.

Do IV sharps need special handling?

Yes — catheters and needles are sharps and go in an FDA-cleared container and sharps kit.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY

Handle it with mail-back.

Easy Rx Cycle ships prepaid mail-back kits sized to an IV or ketamine clinic — fill, seal, and mail them back. We destroy your controlled and non-controlled waste non-retrievable at our DEA-registered facility, with Form 41 handled, and return a Certificate of Destruction. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
Ketamine / controlled infusions	Controlled / medication kit (Sch III, Form 41)
IV sharps	Sharps mail-back kit

Waste stream	The right path
Expired IV meds & vitamins	Pharmaceutical waste kit
Blood / IV waste	Biohazard mail-back kit

Prefer pickup, or higher volume?

Mail-back suits most IV clinics. Higher volume or multiple locations? We'll size a custom program — get a quote at easyrxcycle.com/get-a-quote or call 501-904-2929.

WHY IV & KETAMINE CLINICS CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your IV clinic waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
