

FREE GUIDE · FOR ONCOLOGY & INFUSION CENTERS

The Oncology & Infusion Center's Guide to Disposal.

Trace and bulk chemo under USP 800 —
plus every other stream, handled right.

DEA-REGISTERED

EPA-COMPLIANT

NO CONTRACT

CERTIFICATE OF DESTRUCTION

Compliance, made simple.

Hazardous drugs, done to USP 800.

Oncology and infusion centers revolve around hazardous drugs — trace and bulk chemotherapy governed by USP 800 — alongside infusion sharps, controlled supportive-care medications, and biohazard. Getting the trace-versus-bulk distinction and the USP 800 handling right is the whole game. This guide covers every stream.

The good news

We handle trace and bulk chemo to USP 800 and EPA standards — plus your sharps, controls, and biohazard — with a Certificate of Destruction and no contract. Scheduled pickup available for volume.

AT A GLANCE

Who regulates what.

Agency	What it covers in your practice
OSHA	Bloodborne Pathogens Standard — sharps handling, containers, and annual staff training.
EPA	RCRA — hazardous pharmaceutical waste identification, segregation, and destruction.
DEA	Controlled substances — non-retrievable destruction and DEA Form 41 documentation.
DOT	Safe shipping of regulated medical and pharmaceutical waste in transit.
State	Health-department and environmental rules that vary by state.

THE STREAMS

Every stream, in depth.

Below is each regulated stream your practice produces — what belongs in it, what does not, the rule behind it, how to dispose of it, and a tip to stay clean.

WASTE STREAM 01

Trace & bulk chemotherapy (USP 800)

Your defining stream — trace (RCRA-empty) versus bulk hazardous drug, each on its own path.

GOES IN THIS STREAM

- Trace (RCRA-empty) vials, tubing & PPE
- Bulk / unused hazardous drug
- Spill-cleanup & contaminated USP 800 materials

DOES NOT GO HERE

- Non-hazardous pharmaceuticals
- Sharps (sharps kit)

THE RULE · USP 800 and EPA RCRA — segregate trace (RCRA-empty) from bulk hazardous drug; incinerate/destroy to the required standard.

DISPOSE WITH · Trace chemo mail-back kit; bulk chemo scoped as RCRA-hazardous.

Tip

Trace (RCRA-empty) and bulk chemo follow different paths — segregate them.

WASTE STREAM 02

Sharps

Infusion, injection, and access sharps.

GOES IN THIS STREAM

- Infusion & IV sharps
- Injection needles
- Access-port & blood-draw sharps

DOES NOT GO HERE

- Bloody gauze (biohazard)
- Expired meds (pharmaceutical)
- Non-sharp packaging

THE RULE · OSHA Bloodborne Pathogens Standard — FDA-cleared, puncture-resistant containers, no overfilling, annual training.

DISPOSE WITH · Sharps mail-back kit or scheduled pickup.

Tip

Replace containers at the fill line; high-volume sites should check daily.

WASTE STREAM 03

Controlled substances

Controlled supportive-care and pain medications.

GOES IN THIS STREAM

- Expired / unused Schedule II–V
- Wasted & partial doses
- Surrendered controlled stock

DOES NOT GO HERE

- Non-controlled meds (pharmaceutical kit)
- Sharps

THE RULE · DEA — render non-retrievable, Form 222 for Schedule II transfers, Form 41 for surrendered controls, witnessed logs.

DISPOSE WITH · Controlled-substance destruction, to DEA standards.

Tip

Diversion risk makes witnessed wasting logs and a clean paper trail non-negotiable.

WASTE STREAM 04

Biohazard / regulated medical waste

Infusion and blood-contaminated waste.

GOES IN THIS STREAM

- Blood-soaked materials
- Contaminated PPE
- IV / access waste

DOES NOT GO HERE

- Sharps (sharps kit)
- Lightly soiled everyday items
- Expired meds (pharmaceutical)

THE RULE · OSHA plus your state's medical-waste rules — red bags, labeling, treatment/destruction, retained documentation.

DISPOSE WITH · Biohazard mail-back kit or scheduled pickup.

Tip

Only visibly blood/OPIM-contaminated items are red-bag waste — over-classifying at volume is costly.

WASTE STREAM 05

Pharmaceutical waste

Expired non-controlled, non-hazardous medications.

GOES IN THIS STREAM

- Expired non-controlled Rx
- Non-hazardous injectables
- Samples

DOES NOT GO HERE

- Controlled substances (own kit)
- RCRA-hazardous drugs (own kit)
- Sharps

THE RULE · Do not drain-dispose; segregate hazardous and controlled drugs; destroy with documentation.

DISPOSE WITH · Pharmaceutical waste mail-back kit or pickup.

Tip

Segregate hazardous and controlled drugs first — everything else routes here.

YOUR CHECKLIST

The oncology & infusion compliance checklist.

- ☐ Trace vs bulk chemo segregated per USP 800; bulk routed to hazardous destruction.
- ☐ USP 800 PPE and spill materials handled and destroyed correctly.
- ☐ Infusion sharps in FDA-cleared containers.
- ☐ Controlled supportive-care drugs non-retrievable with Form 41.
- ☐ Staff trained on USP 800 and bloodborne pathogens.
- ☐ Certificates of Destruction retained per your state's rules.

QUESTIONS ONCOLOGY CENTERS ASK

Your oncology center questions, answered.

What's the difference between trace and bulk chemo?

Trace chemo is RCRA-empty — vials, tubing, and PPE emptied of removable drug. Bulk chemo (unused drug, spill cleanup) is RCRA-hazardous and follows the hazardous path. They must be segregated.

Does this meet USP 800?

Yes — segregation, handling, and destruction align with USP 800, with incineration of trace waste and EPA-standard destruction of bulk hazardous drug.

How are supportive-care controlled drugs handled?

Non-retrievable destruction with a DEA Form 41 and witnessed logs.

Do we need a contract?

No — no contract, no minimums.

THE EASY WAY

Handle it with mail-back.

Easy Rx Cycle handles oncology and infusion waste by mail-back or scheduled pickup — trace and bulk chemo to USP 800 and EPA standards, plus sharps, controls, and biohazard, with a Certificate of Destruction. No contract.

QUICK REFERENCE · WHICH KIT FOR WHICH STREAM

Waste stream	The right path
Trace chemo	Trace chemo mail-back kit (USP 800)
Bulk / unused hazardous drug	RCRA-hazardous destruction
Infusion sharps	Sharps mail-back kit
Controlled supportive-care drugs	Controlled destruction (Form 41)
Biohazard / RMW	Biohazard mail-back kit

Prefer pickup, or higher volume?

Higher-volume oncology centers often prefer scheduled pickup. We'll size a USP 800-compliant program — get a quote at easyrxcycle.com/get-a-quote or call 501-904-2929.

WHY ONCOLOGY & INFUSION CENTERS CHOOSE EASY RX CYCLE

- No contract, no minimums — buy as you need
- Flat-rate pricing — no fuel or hidden surcharges
- One vendor for every stream you generate
- DEA-registered, EPA- & OSHA-aligned destruction
- A Certificate of Destruction on every single order

Ready to simplify your oncology center waste?

Shop mail-back kits with prices, or get a custom quote for pickup and higher volume. No contract, cancel anytime.
